

miR-16-5p Regulates Ferroptosis by Targeting SLC7A11 in Adriamycin-Induced Ferroptosis in Cardiomyocytes [Retraction]

Chen Y, Deng Y, Chen L, Huang Z, Yan Y, Huang Z. *J Inflamm Res*. 2023;16:1077–1089.

We, the Editors and Publisher of *Journal of Inflammation Research*, have retracted the following article.

Following publication of the article, concerns were raised about the duplication of images from Figure 5D with images from another unrelated article. Specifically,

- The images for Figure 5D, have been duplicated with the images for Figure 4G from Wang M, Li Q, Yu S, et al. Coronin 3 Promotes the Development of Oncogenic Properties in Glioma Through the Wnt/ β -Catenin Signaling Pathway. *Onco Targets Ther*. 2020;13:6661–6673. <https://doi.org/10.2147/OTT.S257001>.

The authors did not respond to our queries and were unable to provide an explanation for the duplicated images or provide data for the study. As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore retracting the article and the authors were notified of this.

We have been informed in our decision-making by our editorial policies and COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Publish your work in this journal

The Journal of Inflammation Research is an international, peer-reviewed open-access journal that welcomes laboratory and clinical findings on the molecular basis, cell biology and pharmacology of inflammation including original research, reviews, symposium reports, hypothesis formation and commentaries on: acute/chronic inflammation; mediators of inflammation; cellular processes; molecular mechanisms; pharmacology and novel anti-inflammatory drugs; clinical conditions involving inflammation. The manuscript management system is completely online and includes a very quick and fair peer-review system. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
